Job description

Job Responsibility:

- Contribute to digital design activities by contributing to design implementation, checks, simulations, and documentation.
- Assist with coding, reviewing, and debugging digital logic under guidance from senior engineers.
- Work with verification, physical design, and validation teams to enable project execution.
- Help maintain clear design records, test results, and technical documentation.
- Contribute to engineering quality, learning, and teamwork throughout the development cycle.

Requirements/Qualification:

- Recent Bachelor's/Master's degree (or graduating soon) in Electrical Engineering, Electronics, Computer Engineering, Computer Science, Physics, or a related discipline, within past two years
- Hands-on experience from lab work, design projects, internships, coursework, or student competitions is a plus.
- Familiar with role-related engineering, design, verification, programming, or lab tools; willingness to learn quickly is important.
- Strong foundation in engineering fundamentals, problem solving, testing, and technical

documentation.

- Able to collaborate with cross-functional teams and communicate technical ideas clearly.
- Good communication skills in English (written and spoken).

Anticipated hire date: Q1 2027
