Job description

NXP's Technology & Operations organization plays an essential role in the company's success by ensuring the delivery of high quality, scalable, cost-competitive technologies and supply to create a competitive advantage for our customers.

Primary Location: Full time, 12 weeks, on site at Austin Technology and Manufacturing Center (ATMC), 3501 Ed Bluestein, Austin, TX

Job Responsibilities:

- Drive a specific project within the Equipment Engineering team, appropriate in time (less than 3 months generally), scope, and technical knowledge (engineering skill needed, but minimal semiconductor expertise) to an intern
- Learn about the semiconductors and maintenance generally, the fab way of work, and the Equipment Engineering role
- Report out at the end to senior management about the results of the project, benefit to NXP, and what was learned

Job Qualifications:

- The candidate must be pursuing a Bachelor's or Master's degree in Engineering, Mechanical preferred
- Prefer Dec 2027 and May 2028 graduation dates
- Demonstrated hands-on experience in electromechanical system construction, repair, and/or maintenance

In order to be considered for a summer internship with NXP you must be returning to school or graduating at the conclusion of the internship term. If you are graduating prior to July 2027 please apply to Entry Level full-time roles.

[More information about NXP in the United States...](#)

NXP is an Equal Opportunity/Affirmative Action Employer regardless of age, color, national origin, race, religion, creed, gender, sex, sexual orientation, gender identity and/or expression, marital status, status as a disabled veteran and/or veteran of the Vietnam Era or any other characteristic protected by federal, state or local law. In addition, NXP will provide reasonable accommodations for otherwise qualified disabled individuals.
