Job description

Job description:

- Provide Austin regional facilities electrical engineering support to OHT and ATMC Central Plant/Fab.
- Perform electrical studies, design, engineering activities related to projects and power distribution infrastructure.
- Plan and prepare designs, specifications, and estimates for projects compliant to local, state and federal regulations and electrical codes.
- Support Manufacturing, EHS, and Central Plant Operations and Maintenance personnel.
- Evaluate bids, submittals, and contractor/manufacturer-furnished information.
- Evaluate infrastructure through studies for replacements or expansions based on capacity, reliability, and safety of operations.
- Support operations personnel in establishing preventive maintenance, service programs, and operation procedures.
- Identify and implement energy and cost reduction projects.

- Develop key performance indicators to monitor facility systems.

Job qualifications:

- In pursuit of Bachelors degree in Electrical Engineering.
- In order to be considered for a summer internship with NXP you must be returning to school or graduating at the conclusion of the internship term. If you are graduating prior to July 2027 please apply to Entry Level full-time roles.

[More information about NXP in the United States...](#)

NXP is an Equal Opportunity/Affirmative Action Employer regardless of age, color, national origin, race, religion, creed, gender, sex, sexual orientation, gender identity and/or expression, marital status, status as a disabled veteran and/or veteran of the Vietnam Era or any other characteristic protected by federal, state or local law. In addition, NXP will provide reasonable accommodations for otherwise qualified disabled individuals.
