Job description

Business Line Description

NXP's Front End Operations plays an essential role in the company's success by ensuring manufacturing excellence and delivery of high quality, scalable, and cost-competitive semiconductor devices to create a winning advantage for our Customers.

Job Summary:

- Identification and reduction of recurrent machine faults
- Sourcing and installing new equipment
- Reducing defectivity
- Defining tool maintenance procedures
- Training technicians and peers
- Improving tool utilization and availability
- Reducing cost
- Reducing scrap
- Supporting development activities
- Developing and writing specifications

- Implementation of Six-Sigma statistical process control methods
- Capacity planning and modeling
- Participating in and/or leading cross-functional and lean activity teams

Job Qualifications:

- BS in an engineering discipline, Mechanical Engineering desirable.
- 5 years' experience in equipment engineering in a high-volume semiconductor manufacturing environment.
- Previous experience in at least one or more of the following tools/processes required: Applied Materials Producer, Applied Materials Centura.
- Experience in Applied Materials Endura, Ultima, and RTA platforms is a plus.
- Ability to generate, analyze, and interpret equipment performance data and produce a timely action plan to resolve recurring equipment failures
- Demonstrated presentation skills. Candidate will be called upon to train others and present complex datasets and equipment problems/ solutions to diverse audiences.
- Competent in troubleshooting problems and capable of applying logic to isolate and repair them.
- Ability to deal with multiple issues and shifting priorities.
- Strong verbal and written communication skills.
- Ability to interact professionally with manufacturing technicians and process engineering to deal with issues and priorities.
- Good foundational problem-solving skills with creative solutions and out-of-the-box thinking.
- Self-motivated; able to take initiative and effectively prioritize work for self.
- A strong desire to help create a positive, winning, world class working environment.
- Previous experience in Lean Manufacturing methods is highly desirable.
