## Job description

Qorvo (Nasdaq: QRVO) supplies innovative semiconductor solutions that make a better world possible. We combine product and technology leadership, systems-level expertise and global manufacturing scale to quickly solve our customers' most complex technical challenges. Qorvo serves multiple high-growth segments of large global markets, including consumer electronics, smart home/IoT, automotive, EVs, battery-powered appliances, network infrastructure, healthcare and aerospace/defense. Visit [www.qorvo.com](http://www.qorvo.com) to learn how our innovative team is helping connect, protect and power our planet.

Qorvo's Internship Program is designed for college students currently enrolled in an accredited Bachelor's, Master's, or PhD program. Qorvo offers real work experience, exposure to upper management, and the opportunity to pursue full-time opportunities, as available.

### Qorvo's Internship Program offers:

- Challenging, skill-building assignments
- Mentoring and coaching from industry experts
- Launch & Learns and other learning opportunities
- Collaborative team-based work environment

- Networking and social events
- Final presentation to business leaders

Qorvo's **Test Engineering Internships** are offered in our High Performance Analog, Advanced Cellular, and Connectivity and Sensors business groups. Specific projects and responsibilities will be determined based on the business needs at the time of the internship assignment.

#### **Responsibilities may include:**

- Measure products using test equipment like DC source/measure unit's, spectrum analyzers, network analyzers, signal generators and digital pattern generators
- Validate commercial or internal products using manual test stations, creating power budgets per equipment specs and device needs.
- Process, verify and analyze the measured data; produce clear concise presentations and reports
- Creation of test software, to control test equipment, execute test plans, and store data sets.
- Support RF fixture and/or probe card design activities including PCB design, test socket design and interface cabling design
- Document test system and software processes
- Test Multichip Package (MCP) devices for RF and DC parameters including, gain, compression, current, and phase parameters.

#### **Qualifications:**

- Currently pursuing BS, MS, PhD in Electrical Engineering or Computer Science
- 3.0 GPA or higher
- Analog/RF circuit design course work
- Knowledge of programming languages such as VB.NET, C# or other object-oriented language
- Proficiency with Microsoft Office (Excel, Word, PowerPoint)
- Self-Starter with good communication skills
- Effective organization skills for systematic planning and scheduling

*This position is not eligible for visa sponsorship by the Company.*

*Competitive hourly pay commensurate with experience: \$31/hr - \$42/hr (subject to change dependent on physical location)*

*Posted salary ranges are made in good faith. Qorvo reserves the right to adjust ranges depending on the experience/qualification of the selected candidate as well as external competitiveness and internal comparability.*

*Base compensation is one element of Total Rewards offered at Qorvo. More information on the Total Rewards package can be shared upon request.*

**MAKE A DIFFERENCE AT QORVO**

We are Qorvo. We do more than create innovative RF and Power solutions for the mobile, defense and infrastructure markets – we are a place to innovate and shape the future of wireless communications. It starts with our employees. As a unified global team, we bring a commitment to excellence, growth and a passion for creating what's next. Explore the possibilities with us.

We are an Equal Employment Opportunity (EEO) employer and welcome all qualified applicants. Applicants will receive fair and impartial consideration without regard to any characteristics protected by applicable law, including race, color, religion, sex (as defined by law), national origin, age, military or veteran status, genetic information, or disability.
