Job description

About Samsung Austin Semiconductor

Samsung is a world leader in advanced semiconductor technology, founded on the belief that the pursuit of excellence creates a better world. At Samsung Austin Semiconductor, we are Innovating Today to Power the Devices of Tomorrow.

Come innovate with us!

Position Summary

This role as an Automated Material Handling System (AMHS) Engineer is responsible for supporting semiconductor factory automation.

The position is focused on hardware and management of new AMHS projects as well as upgrades / retrofits of existing AMHS equipment.

This position will own equipment installation through equipment qualification and identify opportunities for improvement in terms of safety, efficiency and cost. Additionally, this position also provide support for system operations and data analysis by using system/history logs to correct issues in a timely manner.

Role and Responsibilities

Here's What You'll Be Responsible For:

- Manage internal customers, vendors and contractors to complete assigned projects.
- Perform QA/QC of incoming equipment prior to acceptance.
- Coordinate parts shipping, receiving, storage, and staging.
- Oversee installation and validation of hardware and software upgrades.
- Communicate technical information (8D) to senior leadership inside and outside of department through presentations.
- Assist with preventative maintenance activities by providing awareness of system performance and reliability.
- Creates standard recovery procedures and troubleshooting documentation.
- Provide 24X7 support for installation projects (7 days within a month on-call support is required).

Skills and Qualifications

Here's what you'll need:

- Bachelor's Degree in Engineering (preferred Mechanical)
- 0 to 3 years of experience in Automation Engineering industry experience.
- AutoCAD certification and/or working experience strongly preferred.
- Examples of successful project management and/or certification.
- Always looking for opportunities to simplify, automate tasks, and build new projects.
- Ability to troubleshoot complex systems in a fast paced manufacturing environment.
- Ability to communicate technical details both verbally and in writing.
- Ability to work across cross cultural settings and globally distributed projects.
- Able to work in construction environment with Personal Protective Equipment (PPE: hard toe shoes, hard hat, safety glasses, etc.) and wear clean r
- Must be able to lift > 25 lbs.

The current base salary range for this role is between \$76,000 - \$95,000. Individual base pay rates will depend on factors including duties, work location, education, skills, qualifications and experience. Total compensation for this position will include a competitive benefits package and may include participation in company incentive compensation programs, which are based on factors to include organizational and individual performance.

Total Rewards

At Samsung Austin Semiconductor, base pay is just one part of our total compensation package. The base compensation for this role will depend on education, experience, skills, and location.

We offer a comprehensive benefits package, including:

- Medical, dental, and vision insurance
- Life insurance and 401(k) matching with immediate vesting
- Onsite café(s) and workout facilities
- Paid maternity and paternity leave
- Paid time off (PTO) + 2 personal holidays and 10 regular holidays
- Wellness incentives and MORE

Eligible full-time employees (salaried or hourly) may also receive MBO bonuses based on company, division, and individual performance.

All positions at Samsung Austin Semiconductor are full-time on-site.

U.S. Export Control Compliance

This role may require access to information subject to U.S. export control laws. Applicants must be authorized to access such information or eligible for government authorization.
