Description

Change the world. Love your job.

As a analog IC design engineering intern, you'll architect new TI products and make our customers' visions a reality. You'll define, design, model, implement and document analog, digital, and RF integrated circuits (ICs). And, you'll have the opportunity to work in exciting areas like audio, imaging, high-speed, interface, clocking, medical, high volume linear, automotive, storage, power supply, battery management, linear power and many more.

Some of your responsibilities will include, but will not be limited to:

- Partnering with business teams and system engineering to develop mutually agreeable design specifications
- Providing high-level analysis on chip architecture trade-offs to ensure spec compliance and superior performance at a competitive cost
- Participating in design reviews and creating the necessary design and product documentation
- Supervising IC layouts to ensure a high-performance standard

- Characterizing prototypes, developing test specifications and coordinating with test/product engineering to drive product releases
- Driving behavioral models

Put your talent to work with us as a Design Engineer Intern!

Qualifications

Minimum requirements:

- Currently pursuing a graduate degree in Electrical Engineering, Computer Engineering or Electrical & Computer Engineering
- Cumulative 3.0/4.0 GPA or higher

Preferred qualifications:

- Ability to establish strong relationships with key stakeholders critical to success, both internally and externally
- Strong verbal and written communication skills
- Ability to quickly ramp on new systems and processes
- Demonstrated strong interpersonal, analytical and problem-solving skills
- Ability to work in teams and collaborate effectively with people in different functions
- Ability to take the initiative and drive for results
- Strong time management skills that enable on-time project delivery

About the organization

TI does not make recruiting or hiring decisions based on citizenship, immigration status or national origin. However, if TI determines that information access or export control restrictions based upon applicable laws and regulations would prohibit you from working in this position without first obtaining an export license, TI expressly reserves the right not to seek such a license for you and either offer you a different position that does not require an export license or decline to move forward with your employment.

About the company

Why TI?

- Engineer your future. We empower our employees to truly own their career and development. Come collaborate with some of the smartest people in the world to shape the future of electronics.
- We're different by design. Diverse backgrounds and perspectives are what push innovation forward and what make TI stronger. We value each and every voice, and look forward to hearing yours. [Meet the people of TI](#)
- Benefits that benefit you. We offer competitive pay and benefits designed to help you and your family live your best life. Your well-being is important to us. Please find our country-specific benefits [here](#)

About Texas Instruments

Texas Instruments Incorporated (Nasdaq: TXN) is a global semiconductor company that designs, manufactures and sells analog and embedded processing chips for markets such as industrial, automotive, data center, personal electronics and communications equipment. At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as each generation of innovation builds upon the last to make our technology more reliable, more affordable and lower power, making it possible for semiconductors to go into electronics everywhere. Learn more at [TI.com](https://www.ti.com).

Texas Instruments is an equal opportunity employer and supports a diverse, inclusive work environment. All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, disability, genetic information, national origin, gender, gender identity and expression, age, sexual orientation, marital status, veteran status, or any other characteristic protected by federal, state, or local laws.
