Description

Change the world. Love your job.

Do you strive to understand how electronics work, and enjoy debugging, coding and/or solving technical problems? Here's your chance to innovate for the future! Applications Engineer Interns at Texas Instruments (TI) are technical experts who are focused on leading-edge digital, mixed signal and analog products. We have a strong customer commitment and a great team spirit. If you are looking for an interesting and challenging position with a wide range of exciting responsibilities, you've come to the right place.

In this position, you'll work directly with TI customers to determine their major design challenges and partner with them on creating solutions that focus on ease-of-use and add value to their solution. You may also spend hands-on time in a TI lab tackling problems and delivering innovative development solutions that support our products and drive revenue.

Some of your responsibilities will include, but are not limited to:

- Working with design, marketing, sales, and product definition teams to successfully launch new products into the market
- Promoting TI products and providing appropriate technical solutions to customers to solve their design challenges
- Providing technical support to customers by reviewing designs, debugging problems, and answering questions
- Supporting the customer's technical seminars and distributor training sessions

Put your talent to work with us as an Applications Engineer Intern !

Texas Instruments will not sponsor job applicants for visas or work authorization for this position.

Qualifications

Minimum Requirements:

- Pursuing a Bachelors degree in Electrical Engineering, Electronics Technology, Bio-Medical Engineering, Electrical Engineering Technology, Electrical and Computer Engineering or related field
- Cumulative 3.0/4.0 GPA or higher
- Basic understanding of schematics, layouts and digital components
- Knowledge and understanding of analog circuitry (examples include: op-amps, DC/DC power, data converters, sensing, etc.)

Preferred Qualifications:

- Experience with lab equipment such as oscilloscopes, along with soldering and debugging skills
- Programming skills in C/C++ (LabView recommended)
- Demonstrated strong analytical and problem solving skills
- Excellent communication and presentation skills
- Ability to work in teams and collaborate effectively with people in different functions
- Strong time management skills that enable on-time project delivery
- Ability to build lasting, influential relationships, both inside and outside the organization
- Ability to work effectively in a fast-paced and ever-changing environment
- Ability to take initiative and drive for results
- Ability to influence decisions through a sense of urgency and competitive drive

About the organization

TI does not make recruiting or hiring decisions based on citizenship, immigration status or national origin. However, if TI determines that information access or export control restrictions based upon applicable laws and regulations would prohibit you from working in this position without first obtaining an export license, TI expressly reserves the right not to seek such a license for you and either offer you a different position that does not require an export license or decline to move forward with your employment.

About the company

Why TI?

- Engineer your future. We empower our employees to truly own their career and development. Come collaborate with some of the smartest people in the world to shape the future of electronics.
- We're different by design. Diverse backgrounds and perspectives are what push innovation forward and what make TI stronger. We value each and every voice, and look forward to hearing yours. [Meet the people of TI](#)
- Benefits that benefit you. We offer competitive pay and benefits designed to help you and your family live your best life. Your well-being is important to us. Please find our country-specific benefits [here](#)

About Texas Instruments

Texas Instruments Incorporated (Nasdaq: TXN) is a global semiconductor company that designs, manufactures and sells analog and embedded processing chips for markets such as industrial, automotive, data center, personal electronics and communications equipment. At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as each generation of innovation builds upon the last to make our technology more reliable, more affordable and lower power, making it possible for semiconductors to go into electronics everywhere. Learn more at [TI.com](https://www.ti.com).

Texas Instruments is an equal opportunity employer and supports a diverse, inclusive work environment. All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, disability, genetic information, national origin, gender, gender identity and expression, age, sexual orientation, marital status, veteran status, or any other characteristic protected by federal, state, or local laws.
