Description

Change the world. Love your job.

In your first year with TI, you will participate in the Career Accelerator Program (CAP), which provides professional and technical training and resources to accelerate your ramp into TI and set you up for long-term career success. Within this program, we also offer function-specific technical training and on-the-job learning opportunities that will encourage you to solve problems through a variety of hands-on, meaningful experiences from your very first day on the job.

Applications Engineers at Texas Instruments (TI) are a highly-motivated, synergistic group with great team spirit and a strong commitment to the customer. In this role, you will promote TI products and provide technical solutions to customers that will ultimately go into consumer products like smartphones, PC peripherals, personal medical devices, electric cars, e-bikes and much more. You'll also provide technical support and engage with customers to help define new

products and opportunities for future product development.

Our applications engineers engage with customers virtually and in person to help solve their toughest technical challenges. Understand customer's needs, develop end equipment expertise, help define our products and be part of what's next! You will work on an applications team in one of TI's product lines to gain a deep understanding of specific products within the business unit - how to position them, typical problems/barriers, how to test/debug and how to solve customer problems at a system level. These experiences are hands-on, technical problem-solving focused with the goal of helping you to create compelling solutions and win business for TI.

As an Applications Engineer, you will also get exposure to other roles such as: Product Marketing, Systems & Digital Marketing through formal learning, projects and on-the-job development experiences that will help you broaden your knowledge and accelerate your growth and success at TI.

Put your talent to work with us as an Applications Engineer!

Texas Instruments will not sponsor job applicants for visas or work authorization for this position.

Qualifications

Minimum requirements:

- Bachelors degree in Electrical Engineering, Electronics Technology, Bio-Medical Engineering, Electrical Engineering Technology, Electrical and Computer Engineering or related field
- Cumulative 3.0/4.0 GPA or higher

Preferred qualifications:

- Basic understanding of schematics, layouts and digital components
- Knowledge and understanding of analog circuitry (examples include: op-amps, DC/DC power, data converters, sensing, etc.)
- Programming skills in C/C++ (LabView recommended)
- Experience with lab equipment, like oscilloscopes, along with soldering and debugging skills
- Ability to establish strong relationships with key stakeholders critical to success, both internally and externally
- Strong verbal and written communication skills
- Ability to quickly ramp on new systems and processes
- Demonstrated strong interpersonal, analytical and problem-solving skills
- Ability to work in teams and collaborate effectively with people in different functions
- Ability to take the initiative and drive for results
- Strong time management skills that enable on-time project delivery

About the organization

TI does not make recruiting or hiring decisions based on citizenship, immigration status or national origin. However, if TI determines that information access or export control restrictions

based upon applicable laws and regulations would prohibit you from working in this position without first obtaining an export license, TI expressly reserves the right not to seek such a license for you and either offer you a different position that does not require an export license or decline to move forward with your employment.

About the company

Why TI?

- Engineer your future. We empower our employees to truly own their career and development. Come collaborate with some of the smartest people in the world to shape the future of electronics.
- We're different by design. Diverse backgrounds and perspectives are what push innovation forward and what make TI stronger. We value each and every voice, and look forward to hearing yours. [Meet the people of TI](#)
- Benefits that benefit you. We offer competitive pay and benefits designed to help you and your family live your best life. Your well-being is important to us. Please find our country-specific benefits [here](#)

About Texas Instruments

Texas Instruments Incorporated (Nasdaq: TXN) is a global semiconductor company that designs, manufactures and sells analog and embedded processing chips for markets such as industrial, automotive, data center, personal electronics and communications equipment. At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as each generation of innovation builds upon the last to make our technology more reliable, more affordable and lower power, making it possible for semiconductors to go into electronics everywhere.
