Description

About TI Texas Instruments Incorporated (TI) is a global semiconductor design and manufacturing company that develops analog ICs and embedded processors. By employing the world's brightest minds, TI creates innovations that shape the future of technology.

1. Systems Engineering & Sustaining Support:

- **Technical Exposure:** Gain exposure to high-purity acid, base, and solvent systems (pumped/gas pressured), as well as ultra-pure gases (inert, flammable, corrosive, and pyrophoric).
- **Equipment Familiarity:** Learn about critical components such as Chemical Distribution Units (CDUs), Valve Manifold Boxes (VMBs), Gas Cabinets, and Cryogenic Tanks.
- **Water Treatment:** Assist in understanding de-ionized and ultrapure water systems, including reverse osmosis, ion exchange, and ultrafiltration processes.
- **Engineering Analysis:** Support the team in reviewing system capacity vs. demand, assisting with troubleshooting, and performing systems assessments to drive improvement roadmaps.
- **Documentation:** Assist in the development and maintenance of Piping and Instrumentation Diagrams (P&IDs), Process Flow Diagrams (PFDs), and Standard Operating Procedures (SOPs).

- Reliability Focus: Participate in reliability-driven tasks such as FMEA (Failure Mode and Effects Analysis) and Root Cause Analysis (RCA).

2. Project Management Support:

- Lifecycle Management: Support the engineering analysis, design, and installation oversight of chemical and gas distribution systems.
- Scope & Execution: Assist with projects ranging from individual component installations (like a single VMB) to large-scale factory-wide distribution systems.
- Cross-Functional Collaboration: Learn how to coordinate with diverse engineering disciplines, contractors, and suppliers to ensure projects stay on schedule and within budget.
- Construction & Commissioning: Assist in reviewing construction documentation (submittals/RFIs) and participate in the commissioning process to ensure equipment performs to design specifications.
- Financial Awareness: Learn the business side of engineering by assisting with project financial tracking, including purchase orders and capital forecasts.

Put your talent to work with us as a Facilities Chemical & Gas Engineering Intern !

Texas Instruments will not sponsor job applicants for visas or work authorization for this position.

Qualifications

Minimum Requirements:

- Currently pursuing a undergraduate or graduate degree in Chemical Engineering
- Cumulative 3.0/4.0 GPA or higher

Preferred Qualifications:

- Strong interest in semiconductor manufacturing, industrial utility systems, or large-scale facility operations.
- Basic understanding of fluid mechanics, thermodynamics, or chemical properties.
- Strong analytical and problem-solving skills.
- Excellent communication skills and a desire to work in a fast-paced, collaborative environment.
- Commitment to safety and operational excellence.

About the organization

TI does not make recruiting or hiring decisions based on citizenship, immigration status or national origin. However, if TI determines that information access or export control restrictions based upon applicable laws and regulations would prohibit you from working in this position without first obtaining an export license, TI expressly reserves the right not to seek such a license for you and either offer you a different position that does not require an export license or decline to move forward with your employment.

About the company

Why TI?

- Engineer your future. We empower our employees to truly own their career and development. Come collaborate with some of the smartest people in the world to shape the future of electronics.
- We're different by design. Diverse backgrounds and perspectives are what push innovation forward and what make TI stronger. We value each and every voice, and look forward to hearing yours. [Meet the people of TI](#)
- Benefits that benefit you. We offer competitive pay and benefits designed to help you and your family live your best life. Your well-being is important to us. Please find our country-specific benefits [here](#)

About Texas Instruments

Texas Instruments Incorporated (Nasdaq: TXN) is a global semiconductor company that designs, manufactures and sells analog and embedded processing chips for markets such as industrial, automotive, data center, personal electronics and communications equipment. At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as each generation of innovation builds upon the last to make our technology more reliable, more affordable and lower power, making it possible for semiconductors to go into electronics everywhere. Learn more at [TI.com](https://www.ti.com).

Texas Instruments is an equal opportunity employer and supports a diverse, inclusive work environment. All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, disability, genetic information, national origin, gender, gender identity and expression, age, sexual orientation, marital status, veteran status, or any other characteristic protected by federal, state, or local laws.

If you are interested in this position, please apply to this requisition.
