Description

Change the world. Love your job.

Here' your chance to work as part of a dynamic and challenging engineering team on the latest semiconductor technology. This engineer will have significant exposure to multiple engineering disciplines, making this an excellent base for future career progression.

Many projects provide the opportunity for learning semiconductor wafer fab and assembly processing while interfacing with design engineering, product engineering, test engineering and quality engineering groups. Selected candidates will be assigned to one of several important, but different roles:

- **Fab Quality Assurance Engineer** - conduct frequent analysis of fab process control data, review, release and assist in the troubleshooting of fab processes; participate and assist in managing local audit programs; verify conformance of manufactured IC devices and process materials to relevant TI and customer specifications.
- **Failure Analysis Engineer** - perform failure analysis on products to determine the root cause of failure; work in cross-functional teams to resolve analysis issues; provide progress reports of

analysis as well as a final written report of analysis and findings; and meet cycle time and success rate metrics established for customer satisfaction and quality team success.

- **Customer Quality Engineer** - manage customer returns and use TI tools to provide frequent status updates to affected customers; work effectively with test, design, product and planning engineers, regional quality engineers, regional planners, regional technical sales representatives and marketing representatives to solve customer challenges and provide answers.

Put your talent to work with us as a Quality Engineer !

Texas Instruments will not sponsor job applicants for visas or work authorization for this position.

Qualifications

Minimum Requirements:

- Pursuing a Bachelor's degree in Electrical Engineering, Chemical Engineering, Computer Science, Material Science, Physics, or related.
- Minimum Cumulative 3.0/4.0 GPA, or higher

Preferred Qualifications:

- Strong verbal and written communication skills
- Demonstrated strong analytical and problem solving skills
- Ability to work in teams and collaborate effectively with people in different functions
- Ability to take the initiative and drive for results
- Strong time management skills that enable on-time project delivery
- Ability to work effectively in a fast-paced and rapidly changing environment
- Demonstrated ability to build strong, influential relationships
- Coursework providing knowledge and background in semiconductor processing, process control methodology and/or device failure analysis.

About the organization

TI does not make recruiting or hiring decisions based on citizenship, immigration status or national origin. However, if TI determines that information access or export control restrictions based upon applicable laws and regulations would prohibit you from working in this position without first obtaining an export license, TI expressly reserves the right not to seek such a license for you and either offer you a different position that does not require an export license or decline to move forward with your employment.

About the company

Why TI?

- Engineer your future. We empower our employees to truly own their career and development. Come collaborate with some of the smartest people in the world to shape the future of

electronics.

- We're different by design. Diverse backgrounds and perspectives are what push innovation forward and what make TI stronger. We value each and every voice, and look forward to hearing yours. [Meet the people of TI](#)
- Benefits that benefit you. We offer competitive pay and benefits designed to help you and your family live your best life. Your well-being is important to us. Please find our country-specific benefits [here](#)

About Texas Instruments

Texas Instruments Incorporated (Nasdaq: TXN) is a global semiconductor company that designs, manufactures and sells analog and embedded processing chips for markets such as industrial, automotive, data center, personal electronics and communications equipment. At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as each generation of innovation builds upon the last to make our technology more reliable, more affordable and lower power, making it possible for semiconductors to go into electronics everywhere. Learn more at [TI.com](https://www.ti.com).

Texas Instruments is an equal opportunity employer and supports a diverse, inclusive work environment. All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, disability, genetic information, national origin, gender, gender identity and expression, age, sexual orientation, marital status, veteran status, or any other characteristic protected by federal, state, or local laws.
