Job description

Qorvo (Nasdaq: QRVO) supplies innovative semiconductor solutions that make a better world possible. We combine product and technology leadership, systems-level expertise and global manufacturing scale to quickly solve our customers' most complex technical challenges. Qorvo serves multiple high-growth segments of large global markets, including consumer electronics, smart home/IoT, automotive, EVs, battery-powered appliances, network infrastructure, healthcare and aerospace/defense. Visit www.qorvo.com to learn how our innovative team is helping connect, protect and power our planet.

Qorvo's Internship Program is designed for college students currently enrolled in an accredited Bachelor's, Master's, or PhD program. Qorvo offers real work experience, exposure to upper management, and the opportunity to pursue full-time opportunities, as available.

Qorvo's Internship Program offers:

- Challenging, skill-building assignments
- Mentoring and coaching from industry experts
- Launch & Learns and other learning opportunities
- Collaborative team-based work environment

- Networking and social events
- Final presentation to business leaders

Qorvo's **Mechanical Engineering Internships** are offered in our High Performance Analog business group. Specific projects and responsibilities will be determined based on the business needs at the time of the internship assignment.

Responsibilities may include:

- Contribute to the success of the Qorvo Defense & Aerospace product lines through mechanical design tasks directly related to product development, including:
 - Electronics packaging component design
 - 3D modeling of product assemblies
 - Sourcing and procurement of custom designed hardware
 - Cross-communicating with electrical teams to ensure robust design
- Perform numerical model analysis and thermal characterization, including:
 - Thermal FEA modeling to identify and mitigate potential performance risks
 - Infrared thermography to determine product temperatures during operation
 - Improving model processes to drive design workflow efficiency
 - Structural FEA modeling to quantify component stresses during assembly with focus on manufacturability

Qualifications:

- Currently pursuing a BS or MS in Mechanical Engineering
- Minimum GPA of 3.0
- Self-Starter with strong written and verbal communication skills, organization skills and attention to detail
- 3D CAD experience (preference with SolidWorks)
- Previous 101 level coursework in programming
- FEA or CFD modeling experience
- Previous coursework in heat & mass transfer, statics, and mechanics of materials

This position is not eligible for visa sponsorship by the Company.

Competitive hourly pay commensurate with experience: \$31/hr - \$42/hr (subject to change dependent on physical location)

Posted salary ranges are made in good faith. Qorvo reserves the right to adjust ranges depending on the experience/qualification of the selected candidate as well as external competitiveness and internal comparability.

Base compensation is one element of Total Rewards offered at Qorvo. More information on the Total Rewards package can be shared upon request.

MAKE A DIFFERENCE AT QORVO

We are Qorvo. We do more than create innovative RF and Power solutions for the mobile, defense and infrastructure markets – we are a place to innovate and shape the future of wireless

communications. It starts with our employees. As a unified global team, we bring a commitment to excellence, growth and a passion for creating what's next. Explore the possibilities with us. We are an Equal Employment Opportunity (EEO) employer and welcome all qualified applicants. Applicants will receive fair and impartial consideration without regard to any characteristics protected by applicable law, including race, color, religion, sex (as defined by law), national origin, age, military or veteran status, genetic information, or disability.
