Description

Change the world. Love your job.

Interface across various work areas and organizations to help with the design, development, and analysis of different semiconductor packaging technologies to enable differentiation for TI's analog and embedded processing products. Assignments may include participation in cross-functional teams to develop internal and external solutions for semiconductor packaging technologies, including Wirebond, Flip Chip, Modules, SIPs and other advanced packages at different stages of readiness. Cultivate packaging advancements with work in material, mechanical, thermal, and electrical characterization. TI's innovative packaging technologies are designed to solve customers' problems by delivering advances in miniaturization, integration, high reliability, high performance, and low power.

Put your talent to work with us as a Packaging Engineering Intern !

Texas Instruments will not sponsor job applicants for visas or work authorization for this position.

Qualifications

Minimum Requirements:

- Currently pursuing an Bachelors degree in Mechanical Engineering, Materials Science, Chemical Engineering, Physics, Electrical Engineering or related.
- Cumulative 3.0/4.0 GPA or higher

Preferred Qualifications:

- Semiconductor packaging knowledge is preferred (processes, assembly, reliability, materials, characterization, FA)
- Demonstrated analytical and problem solving skills
- Strong written and verbal communication skills
- Ability to work in teams and collaborate effectively with people in different functions
- Strong time management skills that enable on-time project delivery
- Ability to build strong, influential relationships
- Ability to work effectively in a fast-paced and rapidly changing environment
- Ability to take the initiative and drive for results

About the organization

TI does not make recruiting or hiring decisions based on citizenship, immigration status or national origin. However, if TI determines that information access or export control restrictions based upon applicable laws and regulations would prohibit you from working in this position without first obtaining an export license, TI expressly reserves the right not to seek such a license for you and either offer you a different position that does not require an export license or decline to move forward with your employment.

About the company

Why TI?

- Engineer your future. We empower our employees to truly own their career and development. Come collaborate with some of the smartest people in the world to shape the future of electronics.
- We're different by design. Diverse backgrounds and perspectives are what push innovation forward and what make TI stronger. We value each and every voice, and look forward to hearing yours. [Meet the people of TI](#)
- Benefits that benefit you. We offer competitive pay and benefits designed to help you and your family live your best life. Your well-being is important to us. Please find our country-specific benefits [here](#)

About Texas Instruments

Texas Instruments Incorporated (Nasdaq: TXN) is a global semiconductor company that designs, manufactures and sells analog and embedded processing chips for markets such as industrial, automotive, data center, personal electronics and communications equipment. At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as each generation of innovation builds upon the last

to make our technology more reliable, more affordable and lower power, making it possible for semiconductors to go into electronics everywhere. Learn more at [TI.com](https://www.ti.com).

Texas Instruments is an equal opportunity employer and supports a diverse, inclusive work environment. All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, disability, genetic information, national origin, gender, gender identity and expression, age, sexual orientation, marital status, veteran status, or any other characteristic protected by federal, state, or local laws.
