Description

Change the world. Love your job.

Texas Instruments is seeking a Summer Intern for an exciting opportunity within our Smart Manufacturing and Automation (SMA) Quality & Test organization. As an SMA Intern, you will work on meaningful projects involving AI, machine learning, and workflow automation that are both challenging and impactful to the organization.

The SMA Quality & Test team drives manufacturing excellence across TI's global semiconductor operations through innovative test strategies, quality systems, and process automation. Our team leverages AI and machine learning technologies to optimize manufacturing workflows, enhance test coverage, and enable continuous improvement. As an AI/ML Automation Intern, you will develop intelligent automation solutions, build LLM-powered tools, and create data-driven systems that support manufacturing quality and test operations.

In this role, you'll have the chance to:

- Design and develop AI-powered automation workflows using LLM platforms and agentic frameworks
- Build data analytics dashboards and APIs that support manufacturing quality decisions
- Create and refine prompt engineering solutions for manufacturing use cases

- Collaborate with cross-functional teams to identify automation opportunities and implement ML-driven solutions
- Contribute to test automation frameworks that improve efficiency and reduce manual effort

Put your talent to work with Texas Instruments!

Texas Instruments will not sponsor job applicants for visas or work authorization for this position.

Qualifications

Minimum Requirements:

- Currently pursuing an undergraduate degree in Computer Science, Computer Engineering, Data Science, Electrical Engineering, or a related field
- Cumulative GPA of 3.0/4.0 or higher

Preferred Qualifications:

- Programming experience in Python or a similar language
- Experience with AI code generation platforms (Claude, GitHub Copilot, Cursor) or LLM APIs
- Familiarity with machine learning concepts and frameworks (PyTorch, TensorFlow, scikit-learn)
- Exposure to agentic AI frameworks (LangChain, AutoGPT, CrewAI) or Model Context Protocol (MCP)
- Data Science coursework
- Proficiency in Python, SQL, or scripting languages for automation
- Experience with data visualization tools or dashboard development
- Strong analytical and problem-solving skills
- Effective verbal and written communication skills
- Ability to collaborate with people across different functions
- Comfortable working in a fast-paced, dynamic environment
- Self-motivated with a drive to deliver results

About the organization

TI does not make recruiting or hiring decisions based on citizenship, immigration status or national origin. However, if TI determines that information access or export control restrictions based upon applicable laws and regulations would prohibit you from working in this position without first obtaining an export license, TI expressly reserves the right not to seek such a license for you and either offer you a different position that does not require an export license or decline to move forward with your employment.

About the company

Why TI?

- Engineer your future. We empower our employees to truly own their career and development. Come collaborate with some of the smartest people in the world to shape the future of electronics.

- We're different by design. Diverse backgrounds and perspectives are what push innovation forward and what make TI stronger. We value each and every voice, and look forward to hearing yours. [Meet the people of TI](#)
- Benefits that benefit you. We offer competitive pay and benefits designed to help you and your family live your best life. Your well-being is important to us. Please find our country-specific benefits [here](#)

About Texas Instruments

Texas Instruments Incorporated (Nasdaq: TXN) is a global semiconductor company that designs, manufactures and sells analog and embedded processing chips for markets such as industrial, automotive, data center, personal electronics and communications equipment. At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as each generation of innovation builds upon the last to make our technology more reliable, more affordable and lower power, making it possible for semiconductors to go into electronics everywhere. Learn more at [TI.com](#).

Texas Instruments is an equal opportunity employer and supports a diverse, inclusive work environment. All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, disability, genetic information, national origin, gender, gender identity and expression, age, sexual orientation, marital status, veteran status, or any other characteristic protected by federal, state, or local laws.

If you are interested in this position, please apply to this requisition.
