Job description

Qorvo (Nasdaq: QRVO) supplies innovative semiconductor solutions that make a better world possible. We combine product and technology leadership, systems-level expertise and global manufacturing scale to quickly solve our customers' most complex technical challenges. Qorvo serves multiple high-growth segments of large global markets, including consumer electronics, smart home/IoT, automotive, EVs, battery-powered appliances, network infrastructure, healthcare and aerospace/defense. Visit www.qorvo.com to learn how our innovative team is helping connect, protect and power our planet.

Qorvo's Internship Program is designed for college students currently enrolled in an accredited Bachelor's, Master's, or PhD program. Qorvo offers real work experience, exposure to upper management, and the opportunity to pursue full-time opportunities, as available.

Qorvo's Internship Program offers:

- Challenging, skill-building assignments
- Mentoring and coaching from industry experts
- Launch & Learns and other learning opportunities
- Collaborative team-based work environment

- Networking and social events
- Final presentation to business leaders

Qorvo's **Product Quality Engineering Internships** are offered in our Global Operations business group. Specific projects and responsibilities will be determined based on the business needs at the time of the internship assignment.

Responsibilities may include:

- Writing detailed Qualification test plans and Final Qualification reports.
- Collaborating with teammates and internal customers to finish the qualification on time
- Recertifying the Shelf-Life of materials, components, and finished products.
- Generating key metrics around the daily work of the team and automating the collection of such data
- Performing data extraction and analysis using Spotfire or other data analysis tools.
- Conducting RF test, measurement, and data analysis as required for qualifications

Qualifications:

- Currently pursuing a BS, MS, or PhD in Electrical Engineering
- Minimum GPA of 3.0
- Analog/RF circuit design coursework and/or experience
- Proficiency with Microsoft Office (Excel, Word, PowerPoint)
- High motivation to learn procedures and finish responsibilities on time by asking for training or collaborating with teammates
- Experience using Databricks, Python, or Spotfire is a plus
- Self-starter with strong written and verbal communication skills to convey complex technical information
- Strong organization skills and attention to detail

This position is not eligible for visa sponsorship by the Company.

Competitive hourly pay commensurate with experience: \$31/hr- \$42/hr (subject to change dependent on physical location)

Posted salary ranges are made in good faith. Qorvo reserves the right to adjust ranges depending on the experience/qualification of the selected candidate as well as external competitiveness and internal comparability.

Base compensation is one element of Total Rewards offered at Qorvo. More information on the Total Rewards package can be shared upon request.

MAKE A DIFFERENCE AT QORVO

We are Qorvo. We do more than create innovative RF and Power solutions for the mobile, defense and infrastructure markets – we are a place to innovate and shape the future of wireless

communications. It starts with our employees. As a unified global team, we bring a commitment to excellence, growth and a passion for creating what's next. Explore the possibilities with us. We are an Equal Employment Opportunity (EEO) employer and welcome all qualified applicants. Applicants will receive fair and impartial consideration without regard to any characteristics protected by applicable law, including race, color, religion, sex (as defined by law), national origin, age, military or veteran status, genetic information, or disability.
