Job description

Qorvo (Nasdaq: QRVO) supplies innovative semiconductor solutions that make a better world possible. We combine product and technology leadership, systems-level expertise and global manufacturing scale to quickly solve our customers' most complex technical challenges. Qorvo serves multiple high-growth segments of large global markets, including consumer electronics, smart home/IoT, automotive, EVs, battery-powered appliances, network infrastructure, healthcare and aerospace/defense. Visit www.qorvo.com to learn how our innovative team is helping connect, protect and power our planet.

Qorvo's Internship Program is designed for college students currently enrolled in an accredited Bachelor's, Master's, or PhD program. Qorvo offers real work experience, exposure to upper management, and the opportunity to pursue full-time opportunities, as available.

Qorvo's Internship Program offers:

- Challenging, skill-building assignments
- Mentoring and coaching from industry experts
- Launch & Learns and other learning opportunities
- Collaborative team-based work environment

- Networking and social events
- Final presentation to business leaders

Qorvo's **Software & Firmware Engineering Internships** are offered in our High Performance Analog business group, System & Research team. Specific projects and responsibilities will be determined based on the business needs at the time of the internship assignment.

Responsibilities may include:

- Develop custom firmware for TI's MSP430 and/or ARM M3/M4 architectures in C language.
- Develop custom graphical user interfaces in C# language using Microsoft Visual Studio.
- Additional tasks may include performing various data analyses, algorithm development, and simulations using Python language.
- Analyzing digital and analog schematic diagrams to understand function and control requirements.
- Work as a team member to contribute to system evaluations and demonstrations.
- Participate in design reviews for both software and digital/analog schematics.
- Generate high quality design documentation and present to the team.
- Able to work with internal customers and gain their trust and respect.

Qualifications:

- Currently pursuing a BS, MS, or PhD in Electrical Engineering, Computer Engineering, or Physics.
- Minimum GPA of 3.3.
- Able to read digital and analog electrical schematics and understand device datasheets.
- Working knowledge of 16 or 32 bit microcontroller architecture, prefer MSP430 and ARM.
- Experience with C/C++/C#/Python programming with strong understanding of code generation and debug.
- Exposure to oscilloscopes, logic analyzers, and multi-meters preferred.
- Detail oriented to ensure design and delivery of reliable and defect-free products.
- Self-Starter with good organization and communication skills.
- Ability to enjoy working in fast paced team work environment.

This position is not eligible for visa sponsorship by the Company.

Competitive hourly pay commensurate with experience: \$31/hr - \$42/hr (subject to change dependent on physical location)

Posted salary ranges are made in good faith. Qorvo reserves the right to adjust ranges depending on the experience/qualification of the selected candidate as well as external competitiveness and internal comparability.

Base compensation is one element of Total Rewards offered at Qorvo. More information on the Total Rewards package can be shared upon request.

MAKE A DIFFERENCE AT QORVO

We are Qorvo. We do more than create innovative RF and Power solutions for the mobile, defense and infrastructure markets – we are a place to innovate and shape the future of wireless

communications. It starts with our employees. As a unified global team, we bring a commitment to excellence, growth and a passion for creating what's next. Explore the possibilities with us. We are an Equal Employment Opportunity (EEO) employer and welcome all qualified applicants. Applicants will receive fair and impartial consideration without regard to any characteristics protected by applicable law, including race, color, religion, sex (as defined by law), national origin, age, military or veteran status, genetic information, or disability.
