

Career Accelerator Program - Analog Design Engineer - Bachelors

Texas Instruments · Dallas, TX, United States; Knoxville, TN, United States; Phoenix, AZ, United States; Tucson, AZ, United States

Job ID (this archive)	SC-061
Employer	Texas Instruments
Location(s)	Dallas, TX, United States; Knoxville, TN, United States; Phoenix, AZ, United States; Tucson, AZ, United States
Posted / listing date	2026-09-02
Career stage (archive tag)	New grad / early career
Location group	DFW area
Career lane	Chip design & verification
Pay listed	Not listed
Employer requisition	25017549
Source page	https://careers.ti.com/en/sites/CX/job/25017549
Accessed	2026-09-26

Saved on 2026-09-26 from the employer's public career site. The full posting text below is the employer's own wording, reformatted for printing (site navigation, buttons and cookie banners removed). Live listings change and close; check the source page before applying.

Description

Change the world. Love your job.

In your first year with TI, you will participate in the Career Accelerator Program (CAP), which provides professional and technical training and resources to accelerate your ramp into TI and set you up for long-term career success. Within this program, we also offer function-specific technical training and on-the-job learning opportunities that will encourage you to solve problems through a variety of hands-on, meaningful experiences from your very first day on the job.

As an Analog Design Engineer you will create integrated circuit designs that help bring new TI products to life and make our customers' visions a reality. You'll define, design, model, implement and document analog, digital and/or RF integrated circuits (ICs). And, you'll have the opportunity to work in exciting areas like audio, imaging, high-speed, interface, clocking, medical, high volume linear, automotive, storage, power supply, battery management, linear power and many

more.

As an Analog Design Engineer, you will help define and then design, simulate, and implement analog integrated circuits in silicon. You'll be working on state-of-the-art wafer processes and learning from and collaborating with industry experts. Understanding the various aspects of product development will help you become a better designer. You will spend time performing typical "front-end" design activities such as designing and drawing the schematics, simulating for functionality and parametric performance, and assisting in the IC layout and then running post-layout extracted simulations. You'll also gain exposure to other "back-end" activities such as bench characterization, final test, and failure analysis. This is a great way to apply knowledge from your circuit design coursework and see how designs progress in the real world.

As part of your job, you will also get exposure to other roles such as: Design Verification& Digital Design through formal learning, projects and on-the-job development experiences that will help you broaden your knowledge and accelerate your growth and success at TI.

Put your talent to work with us as an Analog Design Engineer!

Qualifications

Minimum requirements:

- Bachelors degree in Electrical Engineering, Electrical and Computer Engineering or related field
- Cumulative 3.0/4.0 GPA or higher

Preferred qualifications:

- Ability to establish strong relationships with key stakeholders critical to success, both internally and externally
- Strong verbal and written communication skills
- Ability to quickly ramp on new systems and processes
- Demonstrated strong interpersonal, analytical and problem-solving skills
- Ability to work in teams and collaborate effectively with people in different functions
- Ability to take the initiative and drive for results
- Strong time management skills that enable on-time project delivery

About the organization

TI does not make recruiting or hiring decisions based on citizenship, immigration status or national origin. However, if TI determines that information access or export control restrictions based upon applicable laws and regulations would prohibit you from working in this position without first obtaining an export license, TI expressly reserves the right not to seek such a license for you and either offer you a different position that does not require an export license or decline to move forward with your employment.

About the company

Why TI?

- Engineer your future. We empower our employees to truly own their career and development. Come collaborate with some of the smartest people in the world to shape the future of electronics.
- We're different by design. Diverse backgrounds and perspectives are what push innovation forward and what make TI stronger. We value each and every voice, and look forward to hearing yours. [Meet the people of TI](#)
- Benefits that benefit you. We offer competitive pay and benefits designed to help you and your family live your best life. Your well-being is important to us. Please find our country-specific benefits [here](#)

About Texas Instruments

Texas Instruments Incorporated (Nasdaq: TXN) is a global semiconductor company that designs, manufactures and sells analog and embedded processing chips for markets such as industrial, automotive, data center, personal electronics and communications equipment. At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as each generation of innovation builds upon the last to make our technology more reliable, more affordable and lower power, making it possible for semiconductors to go into electronics everywhere. Learn more at [TI.com](https://www.ti.com).

Texas Instruments is an equal opportunity employer and supports a diverse, inclusive work environment. All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, disability, genetic information, national origin, gender, gender identity and expression, age, sexual orientation, marital status, veteran status, or any other characteristic protected by federal, state, or local laws.

If you are interested in this position, please apply to this requisition.
