Description

Change the world. Love your job.

We can't predict what the future holds, but we know Texas Instruments will have a part in shaping it.

Texas Instruments is seeking a process development / integration engineering intern within the Analog Technology Development (ATD) group. We work to define and develop the next generation process and device technologies for TI; driving step-function improvements in performance and cost.

ATD creates world-class technologies by:

- Working with the business units to set process targets, including transistor and passive device performance objectives
- Working with manufacturing to drive process and material development
- Ensuring technologies meet cost, performance, reliability, and yield objectives

Responsibilities include:

- Establishing unit process and process integration strategies to meet objectives
- Support the development and ramp by executing process experiments (SWRs) Model and collect / analyze device and process yield data
- Working with design and system, productization, reliability and manufacturing to ensure the process technologies meets objectives.

Qualifications

Minimum Requirements:

- Currently pursuing graduate degree in areas such as Electrical Engineering, Materials Science, Mechanical Engineering, Physics, Chemical Engineering, Chemistry or related field
- Minimum Cumulative 3.0/4.0 GPA

Preferred Qualifications:

- Semiconductor device physics coursework and research experience
- Demonstrated strong analytical and problem-solving skills
- Strong verbal and written communication skills
- Ability to work in teams and collaborate effectively with people in different functions
- Strong time management skills that enable on-time project delivery
- Demonstrated ability to build strong, influential relationships
- Ability to work effectively in a fast-paced and rapidly changing environment
- Ability to take the initiative and drive for results

About the organization

TI does not make recruiting or hiring decisions based on citizenship, immigration status or national origin. However, if TI determines that information access or export control restrictions based upon applicable laws and regulations would prohibit you from working in this position without first obtaining an export license, TI expressly reserves the right not to seek such a license for you and either offer you a different position that does not require an export license or decline to move forward with your employment.

About the company

Why TI?

- Engineer your future. We empower our employees to truly own their career and development. Come collaborate with some of the smartest people in the world to shape the future of electronics.
- We're different by design. Diverse backgrounds and perspectives are what push innovation forward and what make TI stronger. We value each and every voice, and look forward to hearing yours. [Meet the people of TI](#)
- Benefits that benefit you. We offer competitive pay and benefits designed to help you and your family live your best life. Your well-being is important to us. Please find our country-specific benefits [here](#)

About Texas Instruments

Texas Instruments Incorporated (Nasdaq: TXN) is a global semiconductor company that designs, manufactures and sells analog and embedded processing chips for markets such as industrial, automotive, data center, personal electronics and communications equipment. At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as each generation of innovation builds upon the last to make our technology more reliable, more affordable and lower power, making it possible for semiconductors to go into electronics everywhere. Learn more at [TI.com](https://www.ti.com).

Texas Instruments is an equal opportunity employer and supports a diverse, inclusive work environment. All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, disability, genetic information, national origin, gender, gender identity and expression, age, sexual orientation, marital status, veteran status, or any other characteristic protected by federal, state, or local laws.
