Description

Change the world. Love your job.

In this system engineering intern role, you'll have the chance to:

- Develop advanced analog and digital chips and system products from concept to mass production
- Complete advanced high speed IC design cycles and participate in a variety of system design activities
- Interface directly with TI business units and customers to define product roadmaps
- Assess and negotiate IC development tradeoffs with design teams and customers
- Evaluate silicon systems (hardware and software) and related documentation
- Gather user requirements, translate them to functional specifications, and implement solutions and enhancement projects
- Provide complete documentation for each development lifecycle step
- Perform troubleshooting and debugging on issues related to the system

Texas Instruments will not sponsor job applicants for visas or work authorization for this position.

Put your talent to work with us as a system engineering intern !

Qualifications

Minimum Requirements:

- Currently pursuing a graduate degree in Electrical Engineering, Computer Engineering, Electrical and Computer Engineering or related field
- Cumulative 3.0/4.0 GPA or higher
- Must have understanding of and experience with system design, including writing IC design specifications, developing algorithms and creating system reference models
- Knowledge of structured and/or object oriented programming (C, C++) and signal processing tools (Matlab)

Preferred Qualifications:

- Demonstrated analytical and problem solving skills
- Strong written and verbal communication skills
- Ability to work in teams and collaborate effectively with people in different functions
- Strong time management skills that enable on-time project delivery
- Ability to build strong, influential relationships
- Ability to work effectively in a fast-paced and rapidly changing environment
- Ability to take the initiative and drive for results

About the organization

TI does not make recruiting or hiring decisions based on citizenship, immigration status or national origin. However, if TI determines that information access or export control restrictions based upon applicable laws and regulations would prohibit you from working in this position without first obtaining an export license, TI expressly reserves the right not to seek such a license for you and either offer you a different position that does not require an export license or decline to move forward with your employment.

About the company

Why TI?

- Engineer your future. We empower our employees to truly own their career and development. Come collaborate with some of the smartest people in the world to shape the future of electronics.
- We're different by design. Diverse backgrounds and perspectives are what push innovation forward and what make TI stronger. We value each and every voice, and look forward to hearing yours. [Meet the people of TI](#)
- Benefits that benefit you. We offer competitive pay and benefits designed to help you and your family live your best life. Your well-being is important to us. Please find our country-specific benefits [here](#)

About Texas Instruments

Texas Instruments Incorporated (Nasdaq: TXN) is a global semiconductor company that designs, manufactures and sells analog and embedded processing chips for markets such as industrial, automotive, data center, personal electronics and communications equipment. At our core, we have a passion to create a better world by making electronics more affordable through semiconductors. This passion is alive today as each generation of innovation builds upon the last to make our technology more reliable, more affordable and lower power, making it possible for semiconductors to go into electronics everywhere. Learn more at [TI.com](https://www.ti.com).

Texas Instruments is an equal opportunity employer and supports a diverse, inclusive work environment. All qualified applicants will receive consideration for employment without regard to race, color, religion, creed, disability, genetic information, national origin, gender, gender identity and expression, age, sexual orientation, marital status, veteran status, or any other characteristic protected by federal, state, or local laws.
