Job description

Our vision is to transform how the world uses information to enrich life for all.

Micron Technology is a world leader in innovating memory and storage solutions that accelerate the transformation of information into intelligence, inspiring the world to learn, communicate and advance faster than ever.

The **Engineer - HBM Design for Test (DFT)** is an experienced technical contributor responsible for the **definition, implementation, integration, and support of DFT solutions** across HBM core die and base die for current and next-generation HBM products.

This role focuses on **driving defined DFT architectures**, contributing to DFT specifications, and partnering with multi-functional teams to ensure DFT features meet test, quality, and manufacturability requirements. The Engineer works closely with DFT Architecture, Design Engineering, Product Engineering, Test, and DFT Verification to support successful tape-out, silicon bring-up, and qualification.

Key Responsibilities

- Implement and integrate DFT features for assigned HBM core die and base die designs in alignment with established DFT architecture and guidelines
- Contribute to the development, review, and maintenance of DFT specifications, requirements, and implementation guidelines
- Ensure DFT implementations support high-quality, efficient, and manufacturable HBM products
- Use AI Supported tools and flows where necessary to improve job efficiency
- Collaborate with Design Engineering, Product Engineering, Test, and DFT Verification to: Translate manufacturing and test requirements into actionable DFT implementations. Support alignment between DFT specifications and verification coverage. Identify, debug, and resolve DFT-related issues during build execution, tape-out, and silicon bring-up
- Serve as a DFT contributor or sub-domain owner for assigned programs or functional areas
- Support reuse and standardization of DFT logic and methodologies across HBM products under mentorship from DFT architecture leadership
- Participate in design, verification, and readiness reviews, providing technical guidance and issue resolution support
- Document DFT implementations, lessons learned, and procedures to support organizational knowledge sharing

Minimum Qualifications

- Bachelor's degree in Electrical Engineering or related field (Master's preferred)
- Experience in semiconductor development with exposure to DFT, design, verification, test, or silicon debug
- Working knowledge of memory architectures (HBM or DRAM preferred) Experience implementing DFT features and supporting DFT-related debug and bring-up activities

Preferred Qualifications

- Experience working with DFT verification teams and coverage methodologies
- Familiarity with manufacturing test flows and test requirements for advanced memory products
- Strong written and verbal communication skills
- Ability to work effectively in a multi-functional, program-driven environment

As a world leader in the semiconductor industry, Micron is dedicated to your personal wellbeing and professional growth. Micron benefits are designed to help you stay well, provide peace of mind and help you prepare for the future. We offer a choice of medical, dental and vision plans in all locations enabling team members to select the plans that best meet their family healthcare needs and budget. Micron also provides benefit programs that help protect your income if you are unable to work due to illness or injury, and paid family leave. Additionally, Micron benefits include a robust paid time-off program and paid holidays. For additional information regarding the Benefit programs available, please see the Benefits Guide posted on micron.com/careers/benefits.

Micron is proud to be an equal opportunity workplace and is an affirmative action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, age, national origin, citizenship status, disability, protected

veteran status, gender identity or any other factor protected by applicable federal, state, or local laws.
