Job description

Job Responsibility:

- Contribute to validation activities by preparing setups, executing tests, collecting data, and summarizing results.
- Assist with debugging issues, improving test coverage, and documenting observations under guidance from the team.
- Work with design, systems, and software teams to understand expected behavior and support issue resolution.
- Help maintain validation plans, reports, and technical records for project visibility.
- Contribute to product quality, technical learning, and disciplined test execution.

Requirements/Qualification:

- Currently pursuing a Bachelor's/Master's degree in Electrical Engineering, Electronics, Computer Engineering, Computer Science, Physics, or a related discipline.
- Hands-on experience from lab work, design projects, internships, coursework, or student competitions is a plus.
- Familiar with role-related engineering, design, verification, programming, or lab tools;

willingness to learn quickly is important.

- Strong foundation in engineering fundamentals, problem solving, testing, and technical documentation.
- Able to collaborate with cross-functional teams and communicate technical ideas clearly.
- Good communication skills in English (written and spoken).

In order to be considered for a summer internship with NXP you must be returning to school or graduating at the conclusion of the internship term. If you are graduating prior to July 2027 please apply to Entry Level full-time roles.
